The local processor anticipates adequate processing capacity for these upcoming commercial periods. Fishermen should maintain contact with the buyer to ensure there is adequate processing capacity for their catch.

Fishermen are reminded that they may retain any portion of their catch for personal or subsistence use. Fish retained for personal or subsistence use from a commercial fishery must be reported and recorded in the space provided on an ADF&G fish ticket. Fishermen are also reminded that gillnet gear may not be operated in a manner that obstructs more than one half the width of any waterway. In the intertidal zone this restriction applies at all tide stages. Additionally, gear is restricted to 6-inch or smaller mesh size and 50 fathoms in length in a single shackle.

The Department will be closely monitoring commercial fishing periods to assess fishery performance and anticipates announcing additional commercial fishing periods as warranted. Further announcements will be made from the Bethel Fish and Game office, on the state web site (<http://www.adfg.alaska.gov/index.cfm?adfg=cfnews.main>), and local radio stations. News releases will be faxed to area villages and local fish processing companies.

Commercial fishermen are encouraged to consult Fish and Game regulations prior to beginning commercial fishing operations.
